## Additional Customer Acknowledgements:

1. To complete enrollment, customers must provide a legible copy of all pages of a recent utility bill for Clearway to determine the appropriate solar farm allocation size for a property based on energy consumption, and to validate a utility account for the application of solar bill credits. Clearway will never have access to a customer's utility account.

*Please note, Clearway may reject a customer's application for any reason before the solar farm's energization date should any required documentation not be provided (such as a past utility bill), program qualifications\* not be met, or if the customer's utility account is not validated by the utility.*

2. Clearway customers are guaranteed a 10% discount on the value of the solar bill credits generated each month. Actual savings may vary in the event the customer (i) cancels early, (ii) does not receive credits, or (iii) receives a reduced credit amount due to utility errors or delays. Clearway is not responsible for utility delays in applying solar bill credits.
3. The impact of the solar bill credits on a customer's utility charges can vary month to month due to seasonal variances affecting solar energy production and variances in the utility rate. Clearway does not provide advance notice of any such variations.
4. Clearway is not a retail energy supplier or utility and does not provide renewable power to a customer's property. All solar generation is sent directly to the local power grid, increasing the amount of renewable energy on the power grid for the community.
5. Clearway customers will continue to receive their utility bill as usual, with the solar bill credits resulting from their Clearway subscription applied. Customers are responsible for any balance owed to their utility.
6. Customers will receive a separate invoice from Clearway for the cost of the solar bill credits, inclusive of the 10% discount. For every \$1.00 that a utility bill was reduced, the customer will only pay Clearway \$0.90.
7. Customers may cancel any time through the end of the Term by providing us at least ninety (90) calendar days' written notice. Subscriptions will be fully terminated within 90 days. Customers will continue to receive the solar bill credits and the program savings benefits until the subscription is fully terminated and will be responsible for all Monthly Payments and accrued fees due through the Termination Date, unless the account number on file at the time of cancellation is no longer valid.
