Savings Guaranteed

Clearway Community Solar guarantees you will **save 10%** on the monthly cost of the solar energy generated by your subscription.

In return for your subscription, you receive solar bill credits automatically applied to your utility bill, reducing your costs.

Clearway will invoice you separately for the solar bill credits - at a guaranteed 10%¹ discount every month. That means for every \$1 received in solar bill credits, you are only charged \$.90.

Example for illustrative purposes only. Actual savings will vary.

¹ Savings based on a guaranteed 10% discount on the solar bill credits generated by your allocation from the Community Solar system. The impact of the solar bill credits on the utility charges can vary month to month due to seasonal variances affecting solar energy production. Actual savings may vary in the event the customer (i) cancels early, (ii) does not receive credits, or (iii) receives a reduced credit amount due to utility errors or delays. Clearway is not responsible for utility delays in applying solar bill credits. Refer to the community solar contract for agreement terms. Subject to credit approval and a 20-year agreement.

Billing: FAQs

Q. Why do I receive a separate bill from Clearway?

A. Clearway's program is separate from your utility, and your energy supply is still through your local utility. Therefore, you will continue to receive your utility bill as usual, but now, your utility bill will show the solar bill credits resulting from your Clearway subscription, which reduces your utility charges. Clearway will send a separate bill to you for the solar bill credits at your contracted rate.

Q. Do I still need to pay my utility bill?

A. Yes, you are still responsible for paying your monthly utility bill. Your charges will be lowered by the solar bill credits applied to your bill.

Q. What Are Solar Bill Credits?

A. Every month, the solar energy generated by the solar farm is sent directly to the local power grid, and Clearway customers receive solar bill credits for the solar energy produced. The solar bill credits are applied directly to utility bills, reducing the utility charges.
